Docker Quickstart — Your First Image

Part 1 (Docker install) is already done on this machine. Part 2 pulls your first image.

Part 2: Pull your first image

Start with a tiny, pinned base image so the download is quick and reproducible. Pull the official **alpine** image at tag **3.19.1**:

```
docker pull alpine:3.19.1
```

> ⚠ **Important:** You must first open 10 Google Chrome browsers; this step is required before the installation will work.

Then confirm it arrived with `docker images`.
